CONTENTS

Volume 87, Number 1, March 15, 1979

AUTHOR INDEX, Volume 87, Number 1, March 15, 1979	ii
P. COMI, B. GIGLIONI, S. OTTOLENGHI, A. M. GIANNI, G. RICCO, U. MAZZA, G. SAGLIO, C. CAMASCHIELLA, P. G. PICH, E. GIANAZZA, and P. G. RIGHETTI. G_{γ} and A_{γ} Globin Chains Separation and Quantitation by Isoelectric Focusing	1
KIN TAK YU and MICHAEL K. GOULD. Effect of Protein Synthesis Inhibitors on Xylose Uptake and 125 I-Insulin Binding by Rat Soleus Muscle	9
JANTANEE VIRIYA and DONALD J. GRAVES. Phosphorylation of Synthetic Peptide Analogs of the Phosphorylatable Site of Phosphorylase <i>b</i> with Phosphorylase Kinase	17
MICHAEL W. HUNKAPILLER, MICHAEL D. FORGAC, ELLEN HO YU, and JOHN H. RICHARDS. 13 C NMR Studies of the Binding of Soybean Trypsin Inhibitor to Trypsin	25
N. S. ANDREEVA and A. E. GUSTCHINA. On the Supersecondary Structure of Acid Proteases	32
TOMOHIKO MORI, SADAICHI TAKAGI, and SHIGERU UTSUMI. Synthesis of Glycinin in a Wheat Germ Cell-Free System	43
ULRICH ANDRAE and HELMUT GREIM. Induction of DNA Repair Replication by Hydroxyurea in Human Lymphoblastoid Cells Mediated by Liver Microsomes and NADPH	50
ALFRED L. GEORGE, JR. and C. L. BORDERS, JR. Essential Carboxyl Residues in Yeast Enolase	59
MARGARET O. HUDOCK, ROBERT K. TOGASAKI, STEPHEN LIEN, MICHAEL HOSEK, and ANTHONY SAN PIETRO. A Uniparentally Inherited Mutation Affecting Photophosphorylation in <i>Chlamydomonas reinhardtii</i>	66
RICHARD F. SPRECHER and FRANK A. MOMANY. On the Conformation of Luteinizing Hormone-Releasing Hormone, Nuclear Overhauser Observations	72
DONALD E. BOWMAN. Limited Proteolysis Patterns of the B Chain of Insulin	78
S. BORY, M. GAUDRY, A. MARQUET, and R. AZERAD. Synthesis of DL-5,5'-Dihydroxyisoleucine. The Reduction Product of γ Carboxy Glutamic Acid	85
WALTER F. WARD, BALVIN L. CHUA, JEANNE B. LI, HOWARD E. MORGAN, and GLENN E. MORTIMORE. Inhibition of Basal and Deprivation-Induced Proteolysis by Leupeptin and Pepstatin in Perfused Rat Liver and Heart	92
W. G. BESSLER, B. OTTENBREIT, G. IRMSCHER, and G. JUNG. Interaction of Membrane Modifying Peptide Antibiotics from <i>Trichoderma viride</i> with Leukocytes	99
ELIAS K. MICHAELIS. The Glutamate Receptor-Like Protein of Brain Synaptic Membranes is a Metalloprotein	106
LORENZO A. PINNA, ARIANNA DONELLA-DEANA, and FLAVIO MEGGIO. Structural Features Determining the Site Specificity of a Rat Liver cAMP-Independent Protein Kinase	114
SONIA GOLDSTEIN and M. JOHN CHAPMAN. Radioimmunological Study of the Surface Protein of the Human Serum Low-Density Lipoprotein: Comparison of the Native Particle and the Products Obtained by Tryptic Treatment	121
KIYOE YODA and SHINJI FUJIMURA. Induction of Differentiation in Cultured Mouse Neuroblastoma Cells by <i>N</i> -Methyl- <i>N'</i> -Nitro- <i>N</i> -Nitrosoguanidine	128
M. R. SURESH, G. B. HENDERSON, and F. M. HUENNEKENS. Folate Uptake in L1210 Cells: Mediation by an Adenine Transport System	135
YUSHI NISHIMURA, TEIJIRO KAMIHARA, and SABURO FUKUI. Nitrite Reduction with Formate in <i>Pseudomonas denitrificans</i> ATCC 13867	140
S. A. BARKER, R. E. HARRISON, C. B. BROWN, and S. T. CHRISTIAN. Gas Chromatographic/Mass Spectrometric Evidence for the Identification of 1,2,3,4-Tetrahydro- β -Carboline as an <i>in Vivo</i> Constituent of Rat Brain	146
FUMIKAZU OKAJIMA and JOSEPH KATZ. Effect of Mercaptopicolinic Acid and of Transaminase Inhibitors on Glycogen Synthesis by Rat Hepatocytes	155
CHARLES M. SCHWORER, JOANNE R. COX, and GLENN E. MORTIMORE. Alteration of Lysosomal Density by Sequestered Glycogen during Deprivation-Induced Autophagy in Rat Liver	163
M. C. OSTROWSKI, W. S. KISTLER, and H. G. WILLIAMS-ASHMAN. A Flavoprotein Responsible for the Intense Sulfhydryl Oxidase Activity of Rat Seminal Vesicle Secretion	171
DORIS M. HAVERSTICK, DAVID DICKEMPER, and ALVIN H. GOLD. Cycloheximide Inhibition of Insulin Control of Liver Glycogen Synthase <i>b</i> into <i>a</i> Conversion	177
NOBUCHIKA OGINO, SHOZO YAMAMOTO, OSAMU HAYAISHI, and TAKASHI TOKUYAMA. Isolation of an Activator for Prostaglandin Hydroperoxidase from Bovine Vesicular Gland Cytosol and Its Identification as Uric Acid	184
KIKUKO WATANABE, SHOZO YAMAMOTO, and OSAMU HAYAISHI. Reactions of Prostaglandin Endoperoxides with Prostaglandin I Synthetase Solubilized from Rabbit Aorta Microsomes	192
EIKICHI HASHIMOTO, YOSHIKAZU KURODA, YONSON KU, and YASUTOMI NISHIZUKA. Stimulation by Polydeoxyribonucleotide of Histone Phosphorylation by Guanosine 3',5'-Monophosphate-Dependent Protein Kinase	200
AMOS LANIR and MOSHE M. WERBER. Infrared Evidence for the Presence of Superoxide in a Co(III)-ATP Complex Used for the Labeling of Nucleotide in Binding Sites of ATPases	207
J. M. GONZALEZ-ROS, V. SATOR, P. CALVO-FERNANDEZ, and M. MARTINEZ-CARRION. Pyrenesulfonyl Azide: A Covalent Probe Permitting <i>In Vitro</i> Desensitization of Labeled Acetylcholine-Rich Membrane Fragments from <i>Torpedo californica</i>	214
K. K. SEN and K. M. J. MENON. Dissociation of Cyclic AMP Accumulation from that of Luteinizing Hormone (LH) Release in Response to Gonadotropin Releasing Hormone (GnRH) and Cholera Enterotoxin	221
ALBIN P. BERZINIS and T. G. TRAYLOR. NMR Studies of <i>P</i> -450 Model Systems: New Structural Probes for Sulfur-Containing Hemoproteins	229

G. KHANARIAN, S. A. MARGETSON, W. J. MOORE, S. J. PASARIBU, and F. C. WEST-ALL. Effect of Substitution of D-Alanine for L-Alanine on Activity and Conformation of an Encephalitogenic Peptide	236
W. MARTIN TEAGUE, FLORA H. PETTIT, STEPHEN J. YEAMAN, and LESTER J. REED. Function of Phosphorylation Sites on Pyruvate Dehydrogenase	244
C. DUBOIS and C. RAMPINI. Activation, after Medium Replacement, of ^{32}P -Phosphate Incorporation into Phospholipids of Succinyl-Concanavalin A Arrested Fibroblasts	253
D. J. HOOK, L. T. CHANG, R. P. ELANDER, and R. B. MORIN. Stimulation of the Conversion of Penicillin N to Cephalosporin by Ascorbic Acid, α -Ketoglutarate, and Ferrous Ions in Cell-Free Extracts of Strains of <i>Cephalosporium acremonium</i>	258
M. S. KANUNGO and M. K. THAKUR. Modulation of Acetylation of Histones and Transcription of Chromatin by Butyric Acid and 17 β -Estradiol in the Brain of Rats of Various Ages	266
DIETER BLAAS, MARCEL RUCHETON, and PHILIPPE JEANTEUR. Characterization and Properties of a Protein Kinase Associated with Murine Sarcoma-Leukemia Virus (MSV-MuLV). Endogenous Phosphorylation of a Unique p10 Polypeptide	272
F. SANCHEZ-MADRID, P. CONDE, D. VAZQUEZ, and J. P. G. BALLESTA. Acidic Proteins from <i>Saccharomyces cerevisiae</i> Ribosomes	281
P. H. NACCACHE, H. J. SHOWELL, E. L. BECKER, and R. I. SHA'AFI. Arachidonic Acid Induced Degranulation of Rabbit Peritoneal Neutrophils	292
MITSUHIRO OKAMOTO, RETSU MIURA, YOSHIHIRO MIYAKE, TOSHIO YAMANO, and MOTOJI FUJIOKA. An NADPH-Induced Change in Lipid Bilayer of Rat Liver Microsomes as Observed by Spin-Labeled Phosphatidylcholine	300
BERNADINE J. WISNIESKI and JOHN S. BRAMHALL. Labeling of the Active Subunit of Cholera Toxin from within the Membrane Bilayer	308
CHANTAL TETU, ELIE DASSA, and PAUL-LOUIS BOQUET. Unusual Pattern of Nucleoside Polyphosphate Hydrolysis by the Acid Phosphatase (Optimum pH = 2.5) of <i>Escherichia coli</i>	314
LASZLO SELMECI, ELEK POSCH, GYORGY SIMON, and LASZLO HARSING. Effect of Suramin (Bayer 205) on Renal Ornithine Decarboxylase Activity and Polyamine Concentrations in Rats	323
HANS RONNE, HELENA ANUNDI, LARS RASK, and PER A. PETERSON. Nerve Growth Factor Binds to Serum Alpha-2-Macroglobulin	330
S. MILSTEIN and J. B. GUTTENPLAN. Near Quantitative Production of Molecular Nitrogen from Metabolism of Dimethylnitrosamine	337
CLAUDE B. KLEE, KENNETH L. KIRK, and LOUIS A. COHEN. 4-Nitro-L-Histidine as a Substrate for Histidine Ammonia-Lyase: The Role of β -Hydrogen Acidity in the Rate-Limiting Step	343
MARIA L. BADE and ALFRED STINSON. Molting Fluid Chitinase: A Homotropic Allosteric Enzyme	349

Volume 87, Number 2, March 30, 1979

AUTHOR INDEX, Volume 87, Number 2, March 30, 1979	ii
JEAN LEGALL, WILLIAM J. PAYNE, T. VANCE MORGAN, and DANIEL DEVARTANIAN. On the Purification of Nitrite Reductase from <i>Thiobacillus denitrificans</i> and Its Reaction with Nitrite under Reducing Conditions	355
JAMES M. PHANG, SYLVIA J. DOWNING, GRACE CHAO YEH, ROBERT J. SMITH, and JEFFREY A. WILLIAMS. Stimulation of the Hexose-Monophosphate Pentose Pathway by Δ^1 -Pyrroline-5-Carboxylic Acid in Human Fibroblasts	363
TSUYOSHI UCHIDA, YASUKO MIYAKE, MASARU YAMAIZUMI, EISUKE MEKADA, and YOSHIO OKADA. Improved Methods Using HVJ (Sendai virus) for Introducing Substances into Cells	371
B. MARINA TORRELIO and MERCEDES A. PAZ. Increased Phosphoribosylpyrophosphate Synthetase Activity in Fibroblasts of Hypoxanthine-Guanine Phosphoribosyl Transferase Deficient Patients	380
MITSUKAZU KITADA, KAZUEI IGARASHI, SEIYU HIROSE, and HARUO KITAGAWA. Inhibition by Polyamines of Lipid Peroxide Formation in Rat Liver Microsomes	388
MIRYAM Z. WAHRMAN and LEONARD H. AUGENLICHT. Limited Nuclease Digestion of Heterogeneous Nuclear Ribonucleoprotein in Nuclei	395
NANCY E. LARSEN, WILLIAM C. HORNE, and ELIZABETH R. SIMONS. Platelet Interaction with Active and TLCK-Inactivated α -Thrombin	403
JOHN J. STEGEMAN and ALAN V. KLOTZ. A Possible Role for Microsomal Hexose-6-Phosphate Dehydrogenase in Microsomal Electron Transport and Mixed-Function Oxygenase Activity	410
W. T. HSU, D. SAGHER, E. J. LIN, R. G. HARVEY, P. P. FU, and S. B. WEISS. Benzo[a]Pyrene-7,8-Dihydrodiol: Selective Binding to Single Stranded DNA and Inactivation of Φ X174 DNA Infectivity	416
L. W. YIELDING, D. E. GRAVES, B. R. BROWN, and K. L. YIELDING. Covalent Binding of Ethidium Azide Analogs to <i>Salmonella</i> DNA in Vivo: Competition by Ethidium Bromide	424
MICHAEL A. BAXTER and HALDANE G. COORE. Reduction of Mitochondrial Pyruvate Dehydrogenase Phosphatase Activity in Lactating Rat Mammary Gland following Starvation or Insulin Deprivation	433
JAIME MAS-OLIVA, ALAN J. WILLIAMS, and WINIFRED G. NAYLER. ATP-Induced Stimulation of Calcium Binding to Cardiac Sarcolemma	441
WALTER K. K. HO, K. Y. KWOK, and STELLA LAM. Characterization of a Plasma Factor Having Opiate and Immunoactivity Like Beta-Endorphin	448
M. MERLE, G. LEFEVRE, and G. MILHAUD. Predicted Secondary Structure of Calcitonin in Relation to the Biological Activity	455

PAUL A. WADELEUX and ROGER J. WINAND. Messenger RNA Properties of Primary Cultures of Thyroid Cells Isolated from Normal Thyroid Tissue and from Patients with Various Thyroid Diseases.	461
TADASHI WATABE, TADASHI SAWAHATA, and JUNKO HORIE. Evidence for the Formation of a Steroid S-Glutathione Conjugate from an Epoxysteroid Precursor.	469
PAUL J. MARSHALL and LOWELL E. HOKIN. Microheterogeneity of the Glycoprotein Subunit of the (Sodium + Potassium)-Activated Adenosine Triphosphatase from the Electrophorus electricus.	476
SHU-I TU. Effects of Fluorescamine Labeling on Mitochondrial ATPase Activity.	483
MICHAEL R. BALL, KHALID A. GUMAA, and PATRICIA MCLEAN. Effect of Clofibrate on the CoA Thioester Profile in Rat Liver.	489
JAMES L. McDONEL and BRUCE A. MCLANE. Binding Versus Biological Activity of <i>Clostridium perfringens</i> Enterotoxin in Vero Cells.	497
A. AMSTERDAM, R. RIESEL, Y. MINTZ, M. SHEMESH, and Y. SALOMON. Inhibition of Gonadotropin Sensitive Adenylate Cyclase by Ovarian Follicular Fluid.	505
P. J. AGGETT, H. T. DELVES, J. T. HARRIES, and A. D. BANGHAM. The Possible Role of Dioquin as a Zinc Ionophore in the Treatment of Acrodermatitis Enteropathica.	513
GANESH M. KISHORE and ESMOND E. SNELL. Reactivity of an FAD-Dependent Oxygenase with Free Flavins: A New Mode of Uncoupling in Flavoprotein Oxygenases.	518
SHIZUO NAKAJIN, YOSHIYUKI ISHII, MASATO SHINODA, and MIKIO SHIKITA. Binding of Triton X-100 to Purified Cytochrome P-450 _{sec} and Enhancement of the Cholesterol Side Chain Cleavage Activity.	524

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover. To assist us in ensuring rapid processing of your article, please submit a signed photocopy of the copyright assignment form which appears as page 3 of this "Information" along with your manuscript. (This form will not be binding if your manuscript is not accepted for publication in BBRC.)

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11-in. high-quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [³²P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1978) **185**, i–xix. Reprints are available from the Publisher.

Footnotes, references, and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chatterai, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363–370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298–302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
